HAZARD/TASK	WHO MIGHT BE HARMED?	IS THE RISK ADEQUATELY CONTROLLED?	WHAT FURTHER ACTION IS NECESSARY TO CONTROL THE RISK?
<p>Look only for hazards which you could reasonably expect to result in significant harm under the conditions in your workplace. Use the following headlines as a guide.</p>	<p>There is no need to list individual names – just think about groups of people doing similar work or who may be affected.</p>	<p>Have you already taken precautions against the risk from the hazards you have listed? ie. adequate information, instruction or training? Adequate systems or procedures?</p>	<p>What more could you do for these risks which you have found were not adequately controlled?</p>
