**Please take care of your graphics!**

**If this is the first time you are assembling your pop up display, please get some help handling the graphics and something to stand on!**

**Make sure when you first put up the frame the coloured nodes are at the top, each graphic should be numbered at the back to give you an idea where it goes, however we recommend putting up the centre panel first!**

**Your graphic panels have a very long life but must be assembled and stored with care, when you dismantle the display please lay the graphics together as shown in the photographs below preferably on the bubble wrap they originally came in, and roll image outwards.**
